SHOWING RAILWAYS AND IMPORTANT TOWNS

FOREWORD

The information in the following pages has been compiled with the object of making facts and figures, regarding the growth of the Province of Alberta, available to the public. Progress has been rapid since the formation of the Province, in 1905, particularly along agricultural lines, and the achievements in this direction will indicate to some extent the developments possible in the future, as the great areas of still unsettled agricultural lands are brought under cultivation.

Quite as worthy of note is the growing realization of the importance of the other resources of the Province. The mines, oil and gas wells, forests, fisheries and stores of water power in Alberta constitute vast sources of potential wealth which will make a great contribution to the industrial and commercial life of Canada.

Much additional information has been included which it is hoped will be of interest to prospective settlers. From the meteorological records will be gained an idea of the climate of Alberta, and mention is made of the various services which the Government provides for the people of the Province.

Thanks are extended to the officials of the Dominion Bureau of Statistics, Ottawa, from whose records much of the following information has been secured. The remainder, unless otherwise noted, has been compiled by the Statistical Division of the Provincial Publicity Branch.

PROVINCE OF ALBERTA

CANADA

STATISTICS OF PROGRESS

AREA

The area of Alberta is 255,285 square miles. The Province is roughly 750 miles long, 180 miles wide at its southern base and 400 miles wide at its northern extremity. The southern boundary is the International border between the United States and Canada at Montana. The northern border is the 60th parallel of latitude. To the east is the Province of Saskatchewan, and to the west the Province of British Columbia. To the north of the northern boundary of the Province, the North-West Territories extend for 500 miles to the Arctic Circle.

SUBDIVISION OF AREA

Land	252,925	square miles
Water	2,360	" "
Total	255,285	" "

DISPOSITION OF LANDS IN SURVEYED AREA

as at January 1st, 1928

	Acres
Area under homestead (including military homesteads)	19,066,900
Area under pre-emption, purchased homesteads, sales, half-breed scrip, bounty grants, special grants, etc.	3,491,100
Area granted to railway companies	13,038,595
Area granted to Hudson's Bay Company	2,402,300
Area school lands endowment	3,760,500
Area sold subject to reclamation by drainage	39,400
Area sold under irrigation system	989,800
Area under timber berths	2,131,100
Area under grazing leases	2,953,100
Area of forest reserves and parks	17,072,100
Area reserved for forestry purposes, inside surveyed area	2,085,000
Area of road allowances	1,288,882
Area of parish and river lots	121,221
Area of Indian reserves	1,406,291
Area of Indian reserves surrendered	329,964
Area water-covered lands (inside surveys)	2,296,448
Area undisposed of	15,417,000
Total area inside surveyed tract	87,889,701

ESTIMATE OF AGRICULTURAL AREA

	Acres
Total tract within surveyed area	87,889,701
Total area in reserves and parks, road allowances, timber berths, parish and river lots, forestry purposes, water-covered lands	24,994,751
Balance	62,894,950

Above figures do not, of course, take into account large areas of potential agricultural lands lying outside of the surveyed tract in the Province.

Number of farms in 1926 was 77,130.

Size of farms—Census of 1926 showed size of farms in Alberta to be as follows: Average size of farm, 370 acres. Total acreage of occupied farms, 28,572,987 acres.

Size of Farms	No. of Farms
Under 51 acres	1,987
51 to 160 acres	28,949
161 to 320 "	23,690
321 to 480 "	9,705
481 to 640 "	6,288
641 to 800 "	2,473
801 to 960 "	1,425
961 acres and over	2,613
Occupied by owner	53,747
Occupied by manager	727
Occupied by tenant	11,214
Occupied by part owner and part tenant	11,442

MUNICIPALITIES

Six cities, 55 towns, 118 villages, 169 municipal districts, 229 local improvement districts.

AGRICULTURAL DEVELOPMENT

The early years of Alberta saw the passing of the purely pastoral stage of agriculture which was in existence before the province came into being. In the '70's and '80's, cattlemen of the continent were attracted to this part of the west by the nutritive grasses of the foothills and the great, wide prairies of the southern part of the province, and the country quickly became famous for its ranches and its beef cattle. Many of these ranches have been absorbed by the grain farms of latter days, but there still remains a great area given over to ranching and the production of a high quality of livestock that has brought Alberta into prominence the world over.

The twenty-four years that have elapsed since the formation of the Province have seen the development of agriculture along two distinct lines; first, the purely grain farming, and second, the more diversified class of farming that has brought into prominence the wonderful possibilities of Alberta as a dairy and mixed farming country.

The land resources are a revelation to the newcomer, especially in relation to the great number of different kinds of work that may be undertaken throughout the whole scale of farm land enterprises, such as open pastoral work, small proprietary ranching, broad grain farming, mixed farming, special dairy farming, special pure-bred stock-raising and irrigation farming.

In the development of grain production, Alberta has come to the front very rapidly, not only in the matter of the extremely heavy yields obtained but also for the high quality of grain produced.

HOMESTEAD LANDS

Good homestead land is still available but is chiefly in outlying districts. Every person who is the sole head of a family and every male 18 years of age and over, is entitled on payment of a fee of $10 to enter upon a homestead of one-quarter section of 160 acres. A widow having minor children to support may also secure a homestead. After complying with regulations, a homesteader can qualify for a patent at the completion of three years from date of entry.

FARM LANDS

Improved lands can be bought from $20 an acre upwards and raw lands from $10 per acre up, according to location and improvements. It is possible also to rent land on reasonable terms.

LEASES

Grazing leases on vacant Dominion lands unfit for agricultural purposes may be secured for ten years. Grazing leases may be granted on vacant lands, irrespective of the quality of the soil, located over forty miles from the railway, but subject to withdrawal on a year's notice. The size of a lease is limited to 12,000 acres. Rent is 4 cents per acre, payable half-yearly in advance. Grazing leases may be secured on school lands, also, in Alberta, at 4 cents per acre. Leases on school lands run for one year only.

LAND SETTLEMENT

No fixed amount is set for capital required, but a good start can be made on from $2,000 to $3,000 to provide for payment on land, the erection of a small house, barn, and the purchase of the necessary implements and live stock.

Any time from March to November is a good time to arrive.

IRRIGATION CROPS—SOUTHERN ALBERTA

Irrigation Progress

There are many indications that irrigated lands in Southern Alberta will come in for a good deal of attention in the present year, this following a period of intensive development in 1928 and a marked revival of interest on the part of new colonists. According to the superintendent of the Canadian Pacific Railway's project at Brooks more settlers are coming in than in the whole of the past five years, and he estimates that 200 new families will settle in the block this year. Since the movement was initiated for the establishment of independent irrigation districts, several new districts have steadily been created and brought under irrigation. Increasingly the advantages of this method of farming in that territory of uncertain rainfall have disclosed themselves and irrigation has been the outstanding factor in developing Southern Alberta into one of the most prosperous and progressive sections of Western Canada, an area of intensive farming and assured production.

As an indication of the general farming prosperity of Southern Alberta it is to be noted that the agricultural production of the Lethbridge division of the Canadian Pacific Railway in 1928 was worth $61,400,000, made up of the following items: Wheat $45,000,000; other grains $6,000,000; dairy products $3,500,000; poultry and poultry products $2,500,000; potatoes and vegetables $1,500,000; hay and feed $1,800,000; sugar $500,000; and honey, $60,000. This well illustrates the general diversity of farm production over the territory.

Irrigated crops at the Lethbridge-Coaldale irrigation project brought an average return of $31.08 per acre in 1928 as against $34.79 per acre in 1927, $30.84 in 1926, and $35.73 in 1925, according to the crop census of the superintendent, this being exclusive of livestock. The average for non-irrigated crops was $26.56 per acre, giving irrigated land the advantage by $4.32 per acre or over 17 per cent. The total value of all crops, together with livestock returns, was $34.37 per acre, which is about $6.00 per acre below a good average of all returns from irrigated land in this section, and about this amount less than in 1927, which very closely approached the normal in earning power.

The average yield of wheat on the project was 31.34 bushels per acre on irrigated land as compared with 27.24 bushels per acre on non-irrigated land. Many other averages on irrigated land show striking increases over the average received over the Province of Alberta in general. Oats, for instance, yielded 44.29 bushels compared with 37.7 bushels; barley 42.32 bushels compared with 29.1 bushels; and fodder corn 7.00 tons compared with 5.13 tons. Potatoes gave the highest return for the year with $81.22 per acre, while returns from sweet clover seed and from peas were $75 per acre. Roots other than potatoes gave $68.29 per acre; garden produce $67.09 per acre; corn $48 per acre; and sugar beets $52.59 per acre. This section is making striking progress in the production of hay and hay seed, there being in the last year 7,681 acres devoted to alfalfa, 1,859 to timothy and alfalfa, and 2,125 to other hay. This has had a marked effect in developing Southern Alberta into a leading honey-producing sector.

The Lethbridge-Northern irrigation district, the first co-operative irrigation enterprise to get under way, 156,000 acres, of which 100,000 acres are irrigable, upon which the water was first available in limited quantities in 1924, has made striking progress, quadrupling the number of its settler families in the period, achieving an ever broad diversification of crop on its intensive farms, and consistently swelling its agricultural revenue. In the present year it is to contract for 2,000 acres of sugar beets and preliminary to getting a factory established on the project. Farmers of the project plan a large co-operative egg hatchery at Lethbridge, in the conviction that this can be developed into a million dollar industry. A large sheep industry is in process of being built up on the small farms, thousands of head of excellent foundation stock being distributed in small flocks in the course of the past winter. The Lethbridge-Northern project is cited because it was the first to get under way of the co-operative enterprises. Many other projects are experiencing similar development.

An important new agricultural development in Southern Alberta is the raising of high-grade, disease-free potatoes for shipment to Louisiana and other southern states which are forced to import reliable seed from the north. These states, which now get much of their seed from Montana, are now, according to report, looking to Southern Alberta and other parts of

the province, the reputation of the territory's tubers having extended widely. The Government is encouraging the enterprise in every way possible and it is probable that several cars of certified potatoes will be shipped south this year.

Irrigation introduced in the face of profound scepticism by the Canadian Pacific Railway has transformed semi-arid tracts of Southern Alberta where crop production was problematical into a territory of flourishing farms and prosperous owners. Merely one recent indication furnished of the increasing agricultural prosperity of that section is the fact that $7,250,000 was spent there for new automobiles and machinery in 1928. New automobiles and trucks accounted for $2,500,000; combines for $1,000,000; tractors for $1,250,000. A survey made at harvest time showed there were 551 combines and 2,250 trucks in operation on the Lethbridge railway division.

NOTE—The above statement is an estimate of the market value only of agricultural products. Not all of the crops mentioned are cash crops, as the value of much of the fodder crops is included again in livestock marketed. The statement presented is merely an effort to estimate the market value of products.

LIVESTOCK AND POULTRY

Alberta, having an abundance of coarse grain feeds and good pastures, is pre-eminently adapted to the raising of livestock. It has large packing plants and stockyards in Calgary and Edmonton, and the demand in these home markets contributes in no small degree to the wealth of the province. The increased demand from American and British markets for Canadian beef and bacon is proving a stimulus to livestock production. In this field, also, pool marketing has greatly improved the position of the producer.

There is poultry on 90 per cent of the farms in Alberta. Many farmers and small holders are finding this a very profitable industry.

ALBERTA WHEAT POOL

Starting without a single country or terminal elevator in 1923, the Alberta Wheat Pool now controls 60% of the wheat acreage of the province and is connected with a central selling agency doing business at over a million dollars per day.

		Pool Members	Pool Acreage	Bushels Western Shipments	Bushels Eastern Shipments	Total Bushels Handled	Grades

								$276,350,411

NOTE: By the terms of the agreement between the three provincial Pools, the Pool which ships grain west is credited with the premiums paid at Vancouver over the cash prices prevailing at Fort William. The premiums are used to absorb the extra cost of freight of the grain necessary to be shipped east as all growers are paid on basis of freight rate to Vancouver. In 1924-25 there was approximately $470,000 in premiums, after taking off the freight differential, to use to offset operating expenses. In 1925-26 the freight differential practically absorbed the total sum obtained from premiums.

SEED GRAIN CLEANING AND GRADING PLANT

EDMONTON, ALBERTA

The Field Crops Branch of the Provincial Department of Agriculture operates a Seed Grain Marketing Service for the benefit of members of the Alberta Seed Growers' Association. The seed is cleaned, graded, sacked, inspected by Dominion Government inspectors; sealed and marketed, so that members of the above association are privileged in getting good prices, and circulation of good seed. The following quantities of registered seed were marketed in the respective seasons:

Season	Total Bushels
1922-23	16,500
1923-24	67,903
1924-25	49,953
1925-26	56.890
1926-27	34,736
1927-28	37,814
1928-29	46,860

THE ALBERTA CO-OPERATIVE CREDIT ACT

This Act authorizes the formation of Co-operative Credit Societies for the purpose of lending money to farmers on joint municipal and government guarantee. To establish a society a minimum of twenty-five farmers must subscribe stock to the value of $4,500, of which 20 per cent must be paid up. Each society is managed by a board of directors. Short term loans are made to members for the purchase of seed, feed, implements, stock, and for the carrying on of farming operations. The rate of interest is not fixed, but must not exceed 7½ per cent per annum. The incorporation of a co-operative credit society is obtained by a petition signed by fifteen or more farmers who have subscribed stock to the value of $150 per share, with 20 per cent paid in cash, the balance being covered in four annual payments, secured by notes bearing interest at the rate of 6%.

There are over thirty societies now in operation.

THE CANADIAN FARM LOAN BOARD, ALBERTA DIVISION

The Provincial Treasurer may, with the approval of the Lieutenant Governor in Council, subscribe to the capital stock of the Canadian Farm Loan Board issued pursuant to The Canadian Farm Loan Act, 1927, of the Statutes of Canada (hereinafter referred to as "the principal Act"), to the extent of five per centum of the total loans made pursuant to the principal Act which are outstanding.

There shall be a Board, to be called "The Provincial Farm Loan Board," consisting of four members, three of whom shall be selected by the Canadian Farm Loan Board from nominations made by the Lieutenant Governor in Council and the remaining member shall be appointed by the Board from persons nominated by borrowers from the Board; provided that until such time as the said Board shall appoint a member nominated by the borrowers, the Provincial Board shall consist of the members appointed on the nomination of the Lieutenant Governor in Council.

The powers and duties of the Provincial Board shall be to do all acts and things, and transact any business within the Province, which are authorized by the principal Act, subject to the provisions of the principal Act and to any regulations made by the Board thereunder which have been approved by the Lieutenant Governor in Council.

Subject to the approval of the Board, loans under the principal Act may be made in the Province of Alberta—

(*a*) directly to farmers; and
(*b*) through any co-operative society or colonization society which may from time to time be designated by the Lieutenant Governor in Council.

The Provincial Treasurer and the chief executive officers of the Provincial Board shall be members of the advisory board established by the principal Act.

Every trustee may invest all or any part of the trust moneys in his hands from time to time in the purchase of any Farm Loan Bonds issued pursuant to the principal Act.

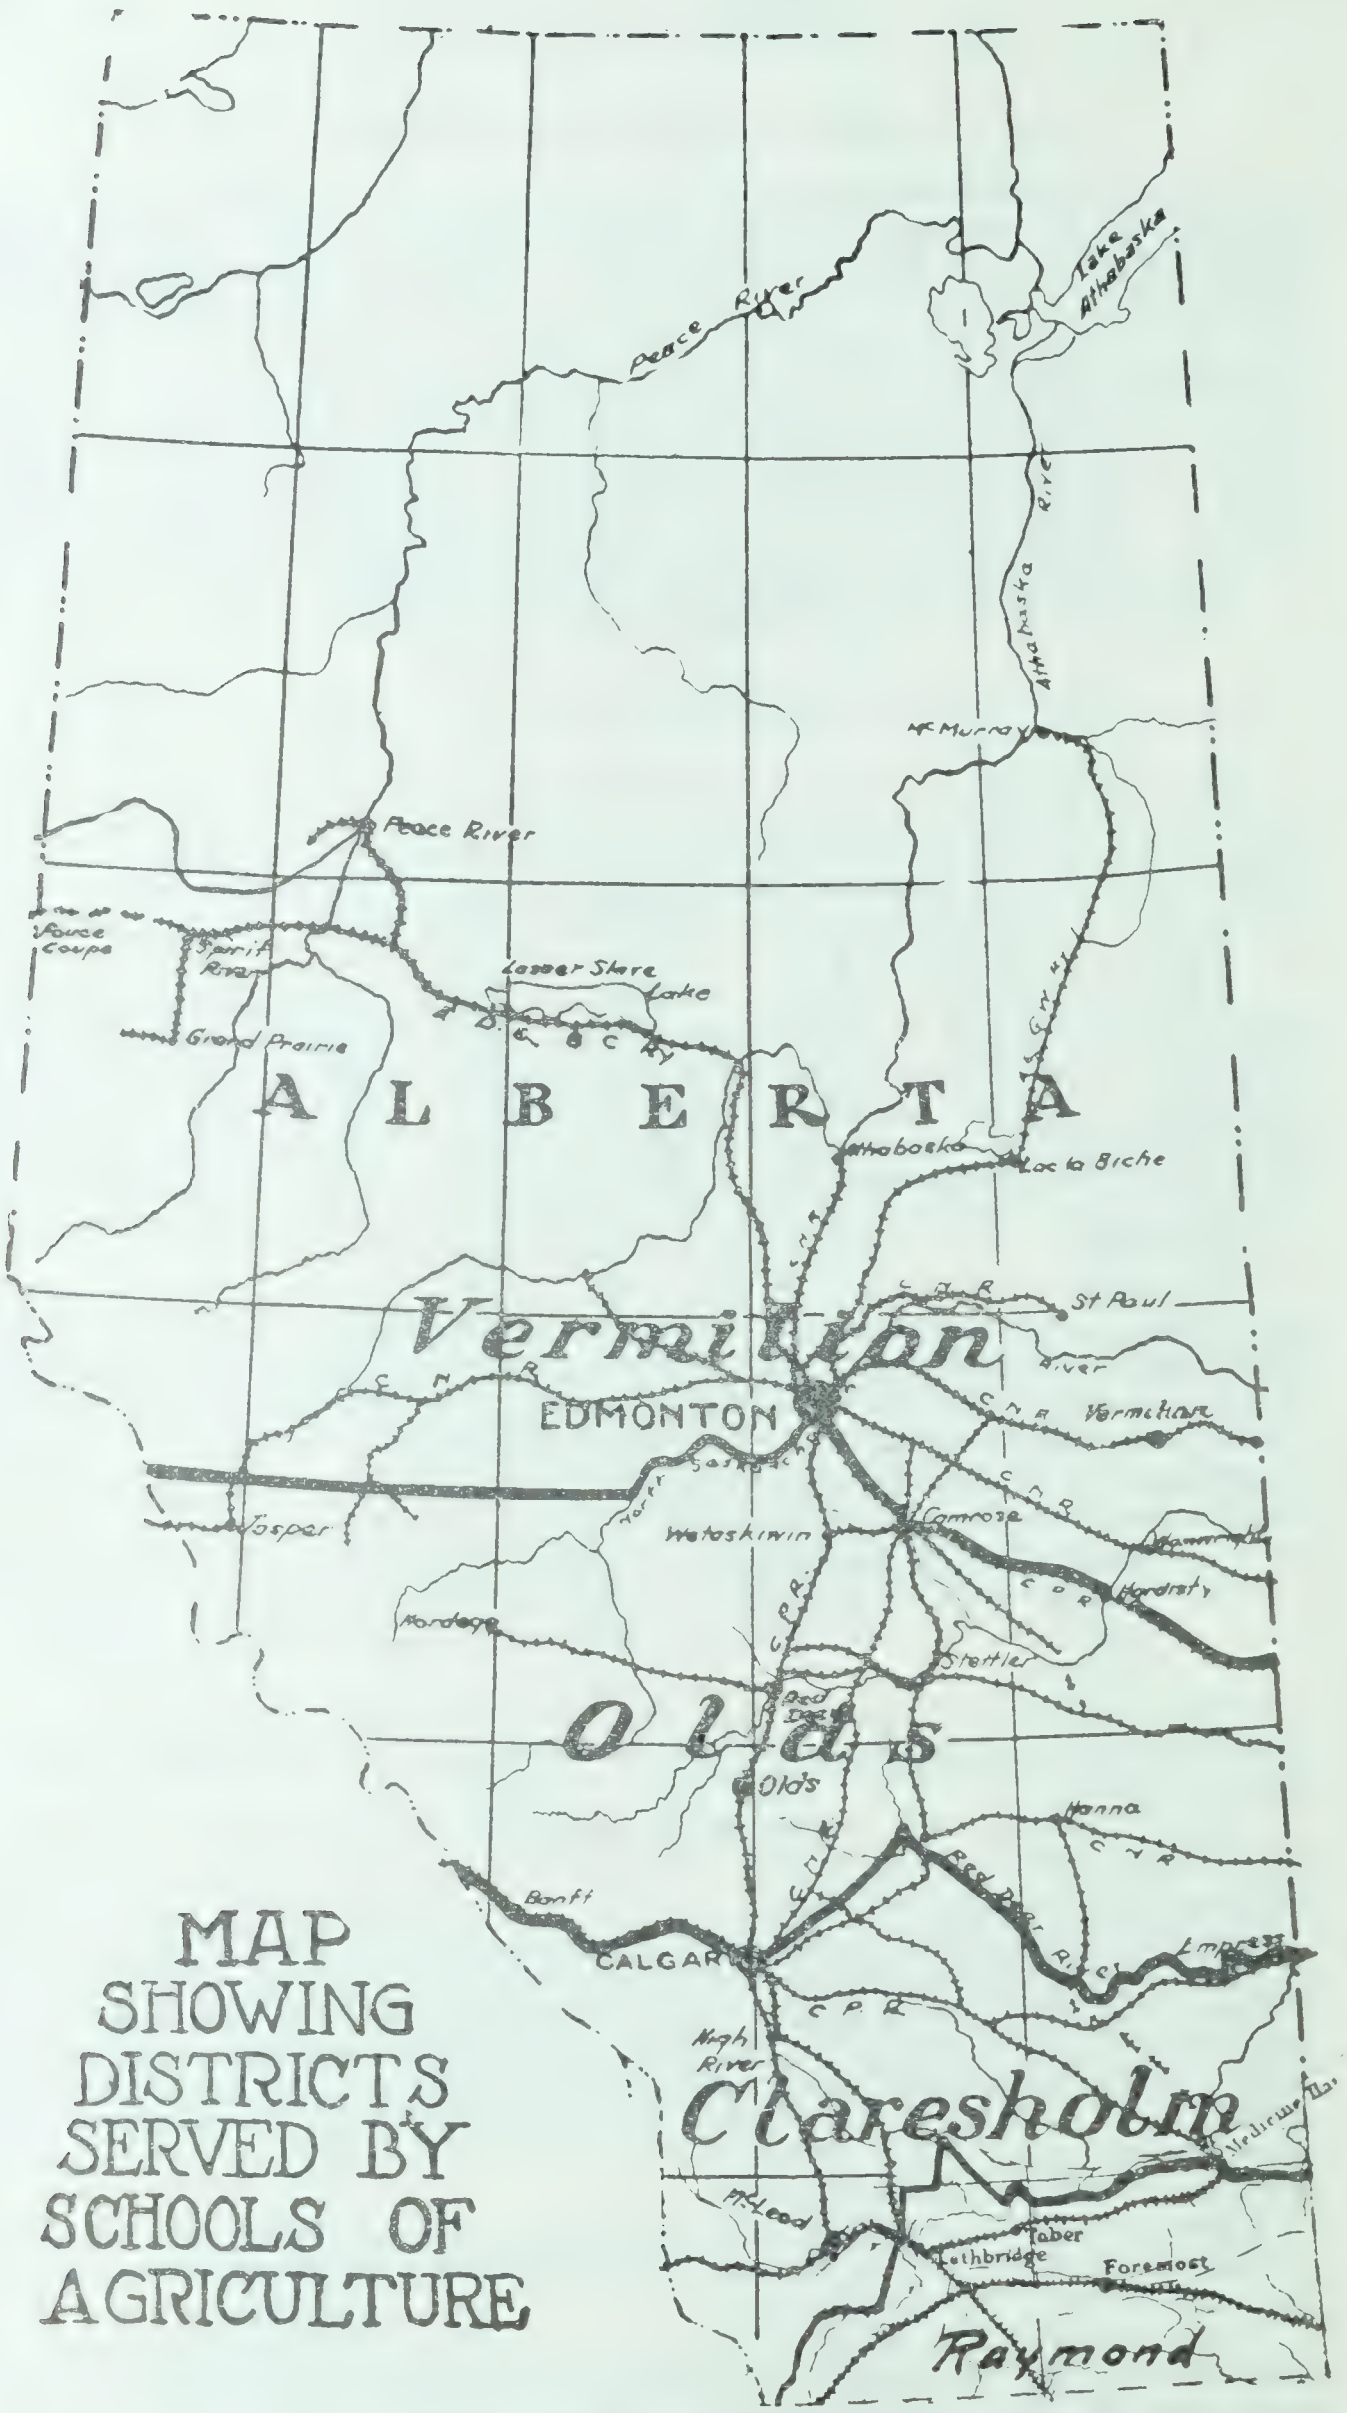
In case of an adverse report on the operations of the Provincial Board by the Auditors, or should the Provincial Board refuse to enforce in a satisfactory manner the regulations and directions of the board, the board may after a conference with the Provincial Board, relieve the Provincial Board of its duties and may undertake directly or through officials the management of the business of the Provincial Board until a new Provincial Board satisfactory to the Board has been nominated and appointed as hereinbefore provided for.

The Governor General in Council may make advances of such sums as may from time to time be required for the purpose of providing for the expenses of the Provincial Board.

All advances and payments for capital stock of the Canadian Farm Loan Board, the subscription to which is hereinbefore authorized, may be made out of the General Revenue Fund without any further or other appropriation than the authority of this Act.

This Act shall be read and construed as supplementary to the provisions of the principal Act.

This Act shall come into force upon the day on which it is assented to, March 21st.



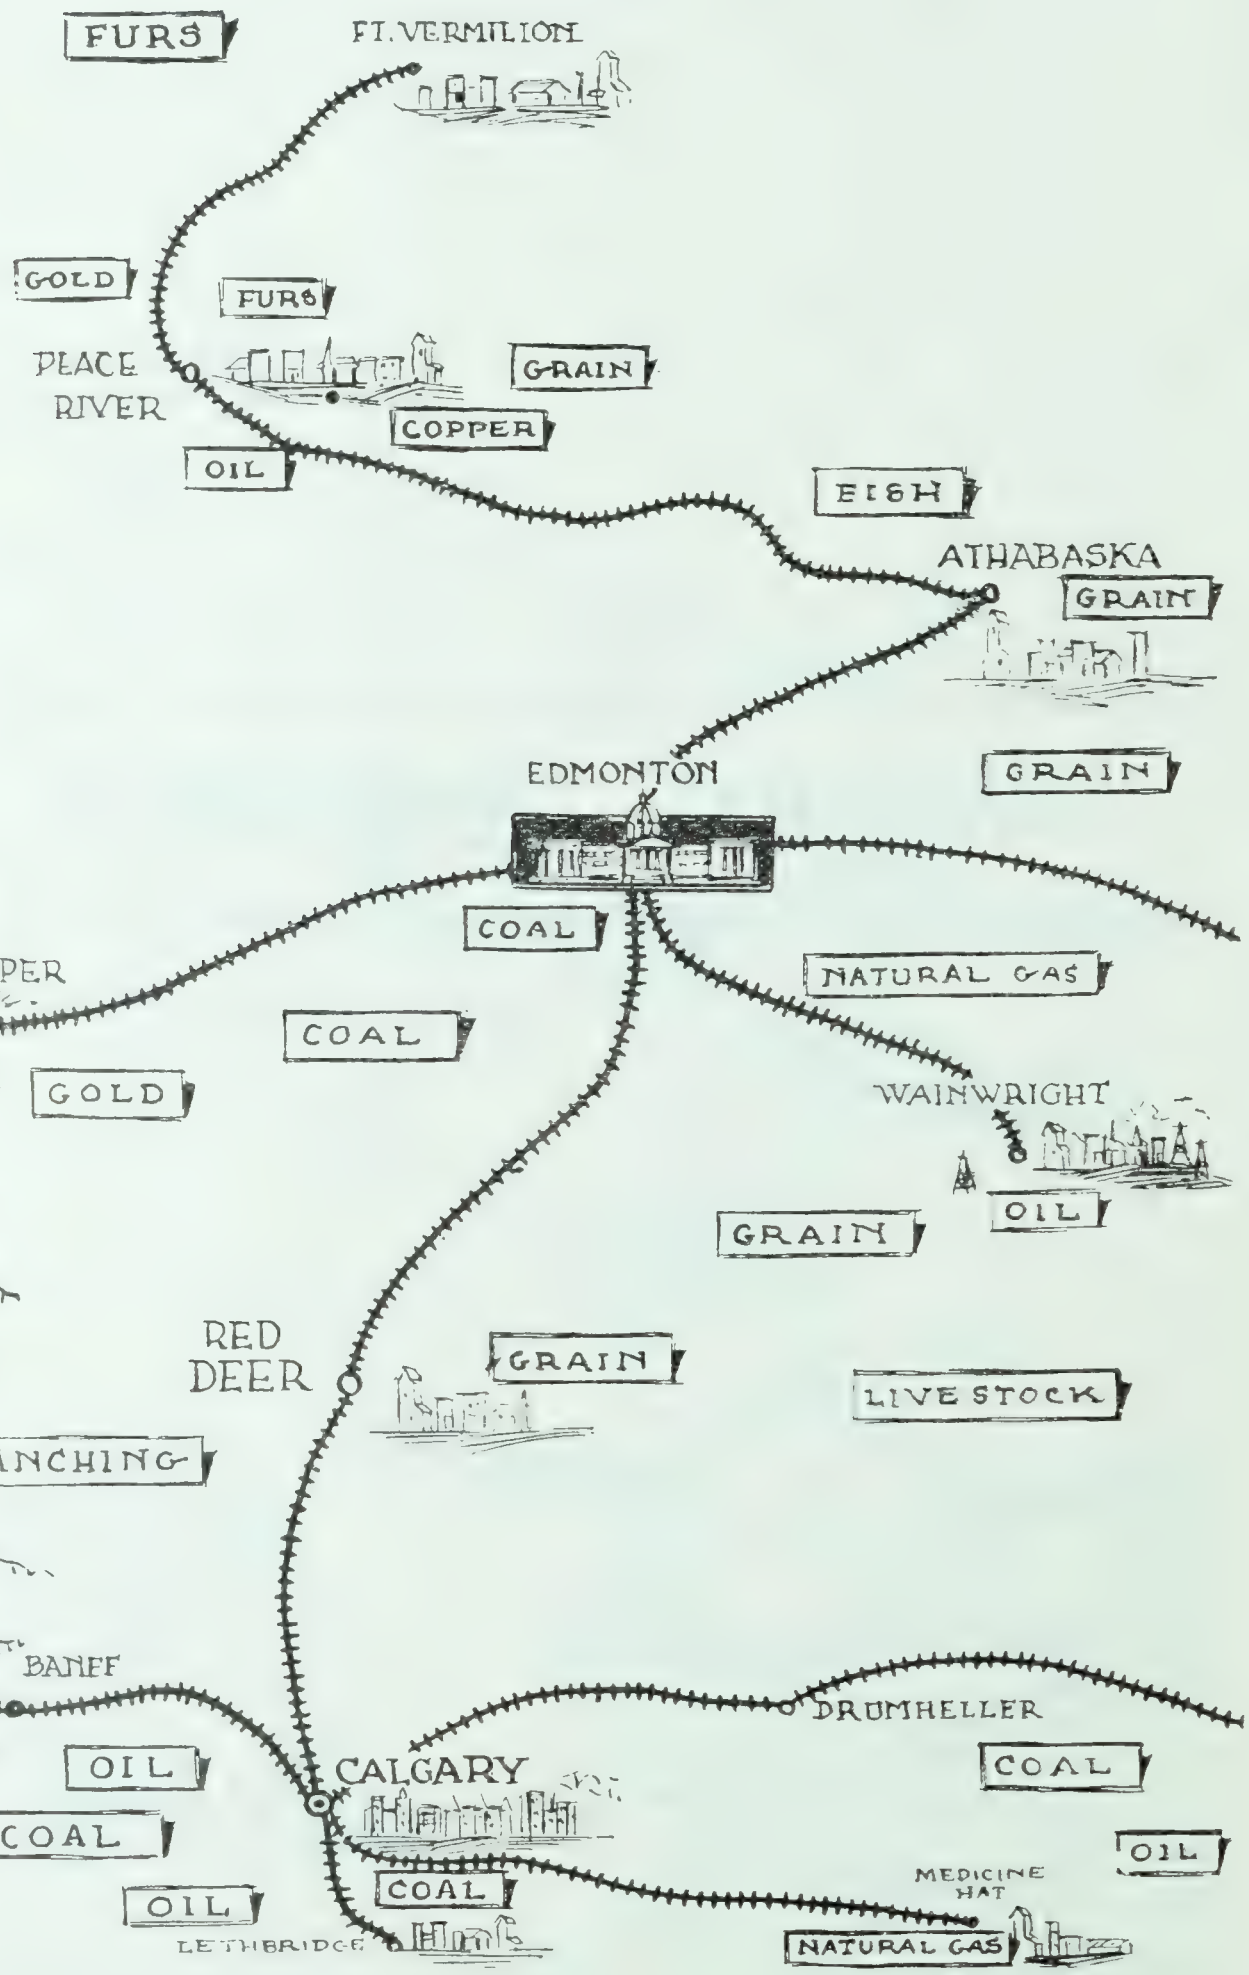
MAP SHOWING DISTRICTS SERVED BY SCHOOLS OF AGRICULTURE

The above map shows the boundaries of the districts served by the four Schools of Agriculture.

All communications regarding the organization of school fairs should be addressed to the Principal of the School of Agriculture in whose district the fair is to be held. The schools are located at Vermilion, Olds, Claresholm, and Raymond.

NATURAL RESOURCES

MAP OF ALBERTA SHOWING PRINCIPAL NATURAL RESOURCES AND LOCATIONS



NATURAL RESOURCES

COAL

Alberta is particularly rich in coal deposits, the quality of which ranges from semi-anthracite to lignite. The province contains 14% of the coal resources of the world and approximately 87% of Canada. Coal is found in three distinct layers—the Kootenay, the Belly River, and the Edmonton formations. The highest grade and the hardest coals are found in the mountains, a lower grade in the foothills, and lignite on the plains. The principal districts where coal is mined are: (*a*) In the Kootenay formation: Crow's Nest Pass, Banff, Canmore, Brazeau, Mountain Park, Jasper Park—mainly bituminous, but some semi-anthracite and semi-bituminous; (*b*) in the Belly River formation: Lethbridge, Taber, Saunders Creek, Coalspur—semi-bituminous; (*c*) in the Edmonton formation: Drumheller, Edmonton, Pembina, Wabamun—lignite to good coking coal. Alberta's coal production in 1928 was over 7,000,000 tons.

Annual Production—	Quantity Tons	Value
1886	43,220	$ 81,112
1896	209,162	581,832
1901	340,275	850,687
1906	1,385,000	2,614,762
1911	1,694,564	3,979,264
1916	4,648,604	11,386,577
1921	5,937,195	27,246,514
1926	6,508,908	20,870,186
1927	6,936,780	21,982,058
1928	7,334,179	23,517,988

There were in operation in 1928 one shale mine and 2 open pits producing shale for brick-making, also 284 coal mines, of which latter 14 were opened, 19 reopened, 42 abandoned, and in addition to the mines abandoned, 24 were closed temporarily, leaving 247 in operation at December 31, 1928.

There were 11,459 persons employed during the month of December, 1928, in Alberta mines, which was a decrease of 156 from the number employed during the month of December, 1927.

GAS

Natural gas is widespread. Calgary and Edmonton companies have done most of the development work to date, outside of the Medicine Hat field.

There are four proven fields:

(*a*) The Medicine Hat field—Tested area, thirty square miles; initial rock pressure was 600 lbs. Gas sand varies in depth, 1,000 to 1,200 feet; is 900 feet above the Dakota sandstone of the Cretaceous. Gas is supplied to Medicine Hat, where there are twenty-five wells, and to Redcliffe.

(*b*) Bow Island field—Is forty miles west of Medicine Hat on Crow's Nest Pass branch of C.P.R. Area twenty-five square miles; initial rock pressure was 790 lbs. This sand is the Dakota sandstone of the Cretaceous. Depth from 1,850 feet to 2,150 feet. Gas is supplied to Calgary, Lethbridge, Macleod, Claresholm, Nanton, Okotoks, Sandstone, etc. North of this, on the main line of the C.P.R., gas found in smaller quantities in three other sands, at depths 900 to 1,800 feet, is supplied to Brooks.

(*c*) Viking field—Eighty miles south-east of Edmonton, near Viking on C.N.R. Tested area, twelve square miles. Wells averaging four and one-half million cubic feet each; average rock pressure 710 lbs. Gas is found in Dakota sandstone at about 2,350 feet, and in another sand at about 2,200 feet. This is an ethane gas, which will doubtless permit of the production of gasoline by absorption. Gas is furnished to Edmonton.

(*d*) Turner Valley field—Thirty-five miles south-west of Calgary. This field includes the richest producing wells in Canada.

Other wells—Gas has been obtained at Suffield, Brooks, Bassano, Wetaskiwin, Vegreville, Ponoka, and other points.

On the Athabasca River strikes have been made at Pelican Rapids and Point de la Biche, the former well has been allowed to blow out wide open since 1897. The gas is found in Grand Rapid sandstone and Dakota sand at 600 to 800 feet, with rock pressure 250 to 300 lbs. In a deeper well near Pelican Rapids, gas was found in a sand in the Devonian limestone. Small showings have been developed at Fort McMurray and Fort McKay.

Production—	M. Cubic Feet	Value
1920	5,663,442	$1,181,345

PETROLEUM

Between Calgary and the mountains, and south to the United States boundary line, oil of a very light gravity has been found in seepages and deep wells, but not in large quantities. It is used as motor fuel without refining. Along the Athabasca River for 100 miles, from Pelican Rapids to Fort McMurray, seepages of gas, heavy oils and tar are found. On the Peace River and along Mackenzie River up to the Arctic Ocean, similar seepages occur at intervals in a region east of the Rocky Mountains hundreds of miles long. Near Peace River Landing oil has been found in two wells 900 to 1,200 feet. A good showing of a black oil 22°B. was found in one of the gas wells of the Viking field at 2,360 feet. Large sums are being spent by the Imperial Oil Company and others in prospecting the northern fields. The Imperial Oil Company has important interests at Grande Prairie, Lesser Slave Lake, Czar, etc. Successful developments in the Sweet Grass district in Montana near the international boundary have aroused much interest in adjoining territory in Alberta. In the Turner Valley, the richest producing oil wells in Canada are to be found. In the Wainwright field, some of the wells produce a strong flow of good crude petroleum. Other fields, including Skiff, Lloydminster and Ribstone, are being developed. Producing oil fields are as follows:

Skiff and Red Coulee—3 wells.
Turner Valley—34 wells.
Wainwright and Ribstone—7 wells.

Total bbls.	318,741	489,531 approx.

SALT

In the form of brine springs, salt occurs in Northern Alberta near the Mackenzie, Slave and Athabasca Rivers. Large quantities of rock salt are found near Fort McMurray. Glauber salts and other commercial salts occur near Fusilier and Wainwright. In Northern Alberta at Fort McMurray on the Athabasca River, inter-stratified beds have been shown at a depth of 650 feet.

	Production Tons	Value
1925	833	$ 8,304
1926	2,037	22,696
1927	100	1,300

BITUMINOUS AND TAR SANDS

A deposit underlies 15,000 square miles in Northern Alberta. Attention has been centred around Fort McMurray, 300 miles north of Edmonton, reached by Alberta and Great Waterways Railway. Here the overburden has been worn by the Athabasca River. Analyzed samples show 15% to 18% of a viscuous liquid of bituminum or asphaltic origin and the remainder sand. Experimental street pavement in Edmonton, Jasper, etc., made from the bitumen has been a success.

In the valley of the Athabasca, above Athabasca Lake, is an immense outcrop of tar sands, estimated to have a minimum distribution of 1,500 square miles. In thickness they vary from 150 to 225 feet. Analysis of a specimen gave bitumen 12.42; water (mechanically mixed), 5.85; siliceous sands, 81.73. Above Boiler Rapid, the tar sands are overlaid by shales sufficient to prevent the oil from rising, and the existence of several natural gas springs affords indications of the existence of oil. Practical application of a process for extracting oil is being made with a plant near Fort McMurray.

These bituminous sands may be used for road construction and may serve as a source of pure bitumen for use in floorings, foundations, insulation of pipes, and as a source of asphaltic oils.

CLAY AND CLAY PRODUCTS

Redcliff and Medicine Hat clay products are manufactured on an extensive scale, including sewerpipe, hollow building and partition tile. At Medicine Hat, earthenware pots, crocks and ornamental flower pots are made from a mixture of local clay and Spokane clay. Clay ironstone is found along the Red Deer River west of Hand Hills. Brick and pottery and stoneware clays are abundant in the shales of the Pierre and Edmonton series. Brick clays are also being utilized, chiefly at Calgary, Edmonton, Lethbridge, Medicine Hat, Sandstone, Red Deer, etc.

FORESTS AND LUMBER

Rocky Mountains, 13,454 square miles; Lesser Slave, 5,023; Cypress Hills No. 1, 81; Cooking Lake, 60. Total area 18,618 square miles.

The total lumber cut in 1927 was 98,507 M. feet b.m., valued at $1,991,597. There were fifty-eight mills in operation, with $2,033,331 capital invested.

Alberta has 86,650 square miles of forest land, of which 60,000 square miles carries timber of merchantable size, and 6,000 square miles carries saw material. The timber resources are estimated to be 16.9 billion board feet of saw material and 247,800,000 cords suitable for pulpwood, fuel, mining timber, ties, posts, etc.

The principal tree species in order of present importance are spruce, lodge-pole pine, Douglas fir, poplar, balsam fir, white birch, and tamarac. Fires have destroyed all but about 25% of the original stand. On the burnt-over areas the reproduction is principally lodge-pole pine, with areas of poplar and birch. Lumbering operations are principally confined to the Rocky Mountains Reserve.

FOREST PRODUCTS OF FARMS, ALBERTA, 1910-1925

Particulars	Unit	1910	1915	1920	1925
Firewood		$159,875	89,531	1,106,559	1,325,402
	Cords	78,351	42,542	352,893	438,515

ESTIMATED STANDING TIMBER

From evidence before pulpwood commission, Edmonton, February 15, 1924:

	Saw Materials Millions Board Feet	Pulpwood, etc. Thousands Cords	Total Millions Cubic Feet
Coniferous Species—			
Jackpine	2,500	80,000	7,616
Larch	100	2,000	196
Spruce	8,500	60,000	6,816
Balsam	200	2,600	267
Douglas Fir	400	200	84
	11,700	144,800	14,979
Deciduous Species—			
White Birch	200	3,000	303
Poplar	5,000	100,000	9,833
GRAND TOTAL	16,900	247,800	25,115

GAME

Practically all the varieties of big game animals native to Western Canada are found in the mountain sections of Alberta between the international boundary and the headquarters of the Smoky River, approximately township 60. Game birds are plentiful throughout the Province. Alberta's annual product in fur and game is valued at more than $2,000,000.

FISH

The northern lakes and rivers teem with commercial fish. Whitefish and lake trout are extensively marketed in cities of the United States from Lesser Slave, Lac La Biche, and Wabamun Lakes, when shipping facilities are good. The Alberta Great Waterways Railway has been a great factor in developing fisheries on Lakes Athabasca, Claire and Namawi. A modern cannery is established on Lake Athabasca. Pike, pickerel, tullibee and goldeyes are plentiful.

OTHER NATURAL RESOURCES

Other great sources of potential wealth are deposits of gypsum, mica, talc, ochre, and bentonite.

MINERAL PRODUCTION OF ALBERTA

	Value
1907	$ 4,657,524
1911	6,662,673
1916	13,297,543
1921	30,562,229
1926	26,977,027
1927	29,309,223
1928	32,367,781

BENTONITE

A colloidal clay, important for industrial purposes. With water added, it forms a mineral jelly several times its original volume. It is found widely in Alberta. Promising deposits associated with coal seams occur near Rosedale.

BUILDING AND ORNAMENTAL STONE

Limestone is quarried for lime and cement in the foothills. Limestone beds extend along the Saskatchewan River. Sandstone quarries have been opened at Brickburn, Glenbow, Rockburn, Stanton, etc.

COPPER

Deposits are found west of Calgary but they are not of economic value at the present time.

GOLD

Gold in paying quantities has been found on the banks and bars of the North and South Saskatchewan Rivers, and in the Pembina, Smoky, McLeod and Athabasca Rivers. As much as $5,000 per annum was at one time recovered from the Saskatchewan River near Edmonton. Record has been obtained of the recovery of $4,000 of alluvial gold in 1915. A rich discovery is reported at Yellow Head Pass on the C.N.R. A living can be panned out of any of the rivers tributary to the Peace, particularly west of Peace River Crossing.

GYPSUM

Gypsum is found in large quantities and under favorable conditions for mining north of Edmonton, and in the Peace River District.

HELIUM

A non-inflammable gas, less buoyant than hydrogen, but much safer, can be made from natural gas in Alberta at a cost of 25 cents per cubic foot. The gasses of Bow Island, Alberta, have a high helium content. Twelve to fifteen million feet are available. Present price 10c to 12c per cubic foot. The uses of helium are for inflating air ships, filling electric light bulbs, and producing low temperature. It is used in laboratories to test properties of metal.

IRIDIUM

A deposit is reported in the upper waters of the Peace River.

IRON

Some work has been done on iron-bearing beds nine miles east of Blairmore. Clay ironstone occurs on Red Deer River, west of Hand Hills.

OCHRE

Seventy miles north of Edmonton, six miles from the railroad, there are large deposits of yellow, red and brown ochre, which, according to analyses, when ground with oil, make an excellent grade of paint.

GOVERNMENT OF THE PROVINCE OF ALBERTA

Department of Agriculture — Publicity Commissioner's Office

COAL RESERVES ALBERTA

Alberta comprises 14% of the entire World's coal reserves

Alberta comprises 72% of the British Empire reserves

Alberta comprises 87% of Canada's reserves

Alberta comprises 21% of North America's reserves.

Alberta's total Coal Reserve is estimated at 1.059.000. million tons, a sufficient reserve to last the whole of Canada for many generations.

MISCELLANEOUS

INDUSTRIES

Alberta is now attracting Eastern financial interests, which realize that the increasing population, the development of the natural resources, and the industrial opportunities which of recent years are so apparent in the West provide a wonderfully promising field for the introduction of their manufacturing business in the Province.

Recently enacted legislation provides a bonus in the form of a fixed taxable assessment on new industrial plants to be established in the Province prior to 1930.

The following statistics relate to the principal industries:

LUMBER AND TIMBER, ETC.

It is estimated that Alberta has an area of more than 60,000 square miles of merchantable timber and there are also some 12,000,000 acres of forest reserves. The sawmill timber is estimated at 16 billions board feet, and the pulpwood material at 270,000,000 cords. The annual cut approaches 50,000,000 feet.

COST OF POWER FOR APPLIANCES

Although the rates vary considerably throughout this market, they are almost invariably lower than in the United States or Great Britain. The City of Winnipeg claims to have the cheapest power of any large city in the world and its homes rank very high in the number and variety of electrical appliances in use.

During the years 1927 and 1928 great expansions have been made by practically all the public utility organizations in this field and the number of new consumers is increasing at a faster rate than the population.

GROWTH OF THE ELECTRICAL MARKET IN THE PRAIRIE PROVINCES

The average daily output of water-power energy for these provinces indicates the growth of the market for appliances in the years named. Power generated by fuel amounts to about one-fourth of the totals given below.

	K.W.H. per Day
May, 1925	1,430,000
May, 1926	1,599,000
May, 1927	2,386,000
May, 1928	2,753,000

COAL

The coal industry of Alberta has assumed immense proportions. There are 247 mines in operation, employing 11,473 persons. With the prospect of improved markets, there is practically no limit to future production.

CLASSIFICATION OF PRODUCTION—

Year	Domestic Tons	Bituminous and Sub-Bituminous Tons	Anthracite Tons	Total Tons
1906	602,780	546,623	235,597	1,385,000

RURAL ORGANIZATIONS

Community life is highly organized through the medium of the United Farmers of Alberta, United Farm Women of Alberta, Women's Institutes, Agricultural Societies and many other organizations.

PUBLIC HEALTH

The Department of Public Health provides many services for the improvement of health conditions by—

(*a*) Public Health nurses conducting school inspections, holding clinics, and giving information on health matters;

(*b*) Travelling clinics to give necessary medical and surgical services in outlying districts at a reasonable cost.

(*c*) Lectures given at various centres in the interest of public health.

HOSPITALS

There are 88 hospitals in the Province, of which 64 are general, 20 municipal, 3 mental, and 1 for tubercular patients. These employ a staff of 500 graduate nurses and over 600 undergraduates.

The municipal hospital service is maintained by a tax averaging from two to three cents an acre on the lands in the hospital district, and those paying these rates are entitled to hospital services at a low rate, which is usually $1.00 per day. There are 21 hospital districts in the province. Sixty private hospitals also operate under provincial license.

ALBERTA WOMEN'S BUREAU SERVICE

This branch directs its efforts towards the improvement of home conditions among the people, and carries on demonstrations in all branches of home economics. A circulating library for women's organizations is operated in connection with the bureau.

VITAL STATISTICS

Births

POSTAL STATISTICS FOR THE PRAIRIE PROVINCES

(Canadian Business Research Bureau)

Digested from the latest returns these indicate the distribution of population.

	Manitoba	Saskatche'n	Alberta	Total
Total on P.O. List in Cities	62,862	25,913	42,471	131,246
Total receiving mail at Rural P.O.	80,133	145,060	93,719	318,912
Total Rural Route Boxholders	3,529	2,005	5,001	10,535
Grand Totals	146,524	172,978	141,191	460,693

RADIO ON THE PRAIRIES

The Prairie Provinces contained, in 1927, 31 broadcasting stations compared with 27 in 1926. These were distributed as follows:

	Manitoba	Saskatchewan	Alberta	Total
1926	3	13	11	27
1927	2	15	14	31

Although radio fans require a license in Canada the difficulties of collecting the nominal fee charged ($1.00) are such that the official figures purporting to represent the number of fans licensed are practically valueless as a guide to the actual conditions. They may, however, when compared with previous periods, serve as an indication of growth. The number of receiving licenses issued in the Prairie Provinces in 1927 showed an increase of 20.18% compared with 1926. The years 1926 and 1927 produced record business in Western Canada for the most progressive of radio manufacturers.

HAIL INSURANCE—ALBERTA

(Extract from report of the Hail Insurance Board of Alberta)

Although hail losses for 1928 have not been quite as heavy as in 1927, they have been almost double those of a normal year, and represent the second highest in the history of the province. In 1927 the loss was 17% of the risk, but $650,000 was taken out of hail insurance reserve to reduce the rates, leaving the actual amount to be raised by taxation less than 13% of the risk for the entire province. In 1928 the loss plus cost of administration was a trifle more than 13%, and there was very little reserve available to reduce the rates.

Totals		8,481	1,328,432	503½	3,072	378,391

Class A had a rate of 18 per cent and was composed of municipal districts 99, 129, 190, 191, 219, 220 and 250.

Class B had a rate of 16 per cent and composed of municipal districts 98, 128, 159, 218, 221, 275, 279, 280, 281, 305, 306, 307, 308, 310, 311, 335, 337, 371, 429, 430 and 431.

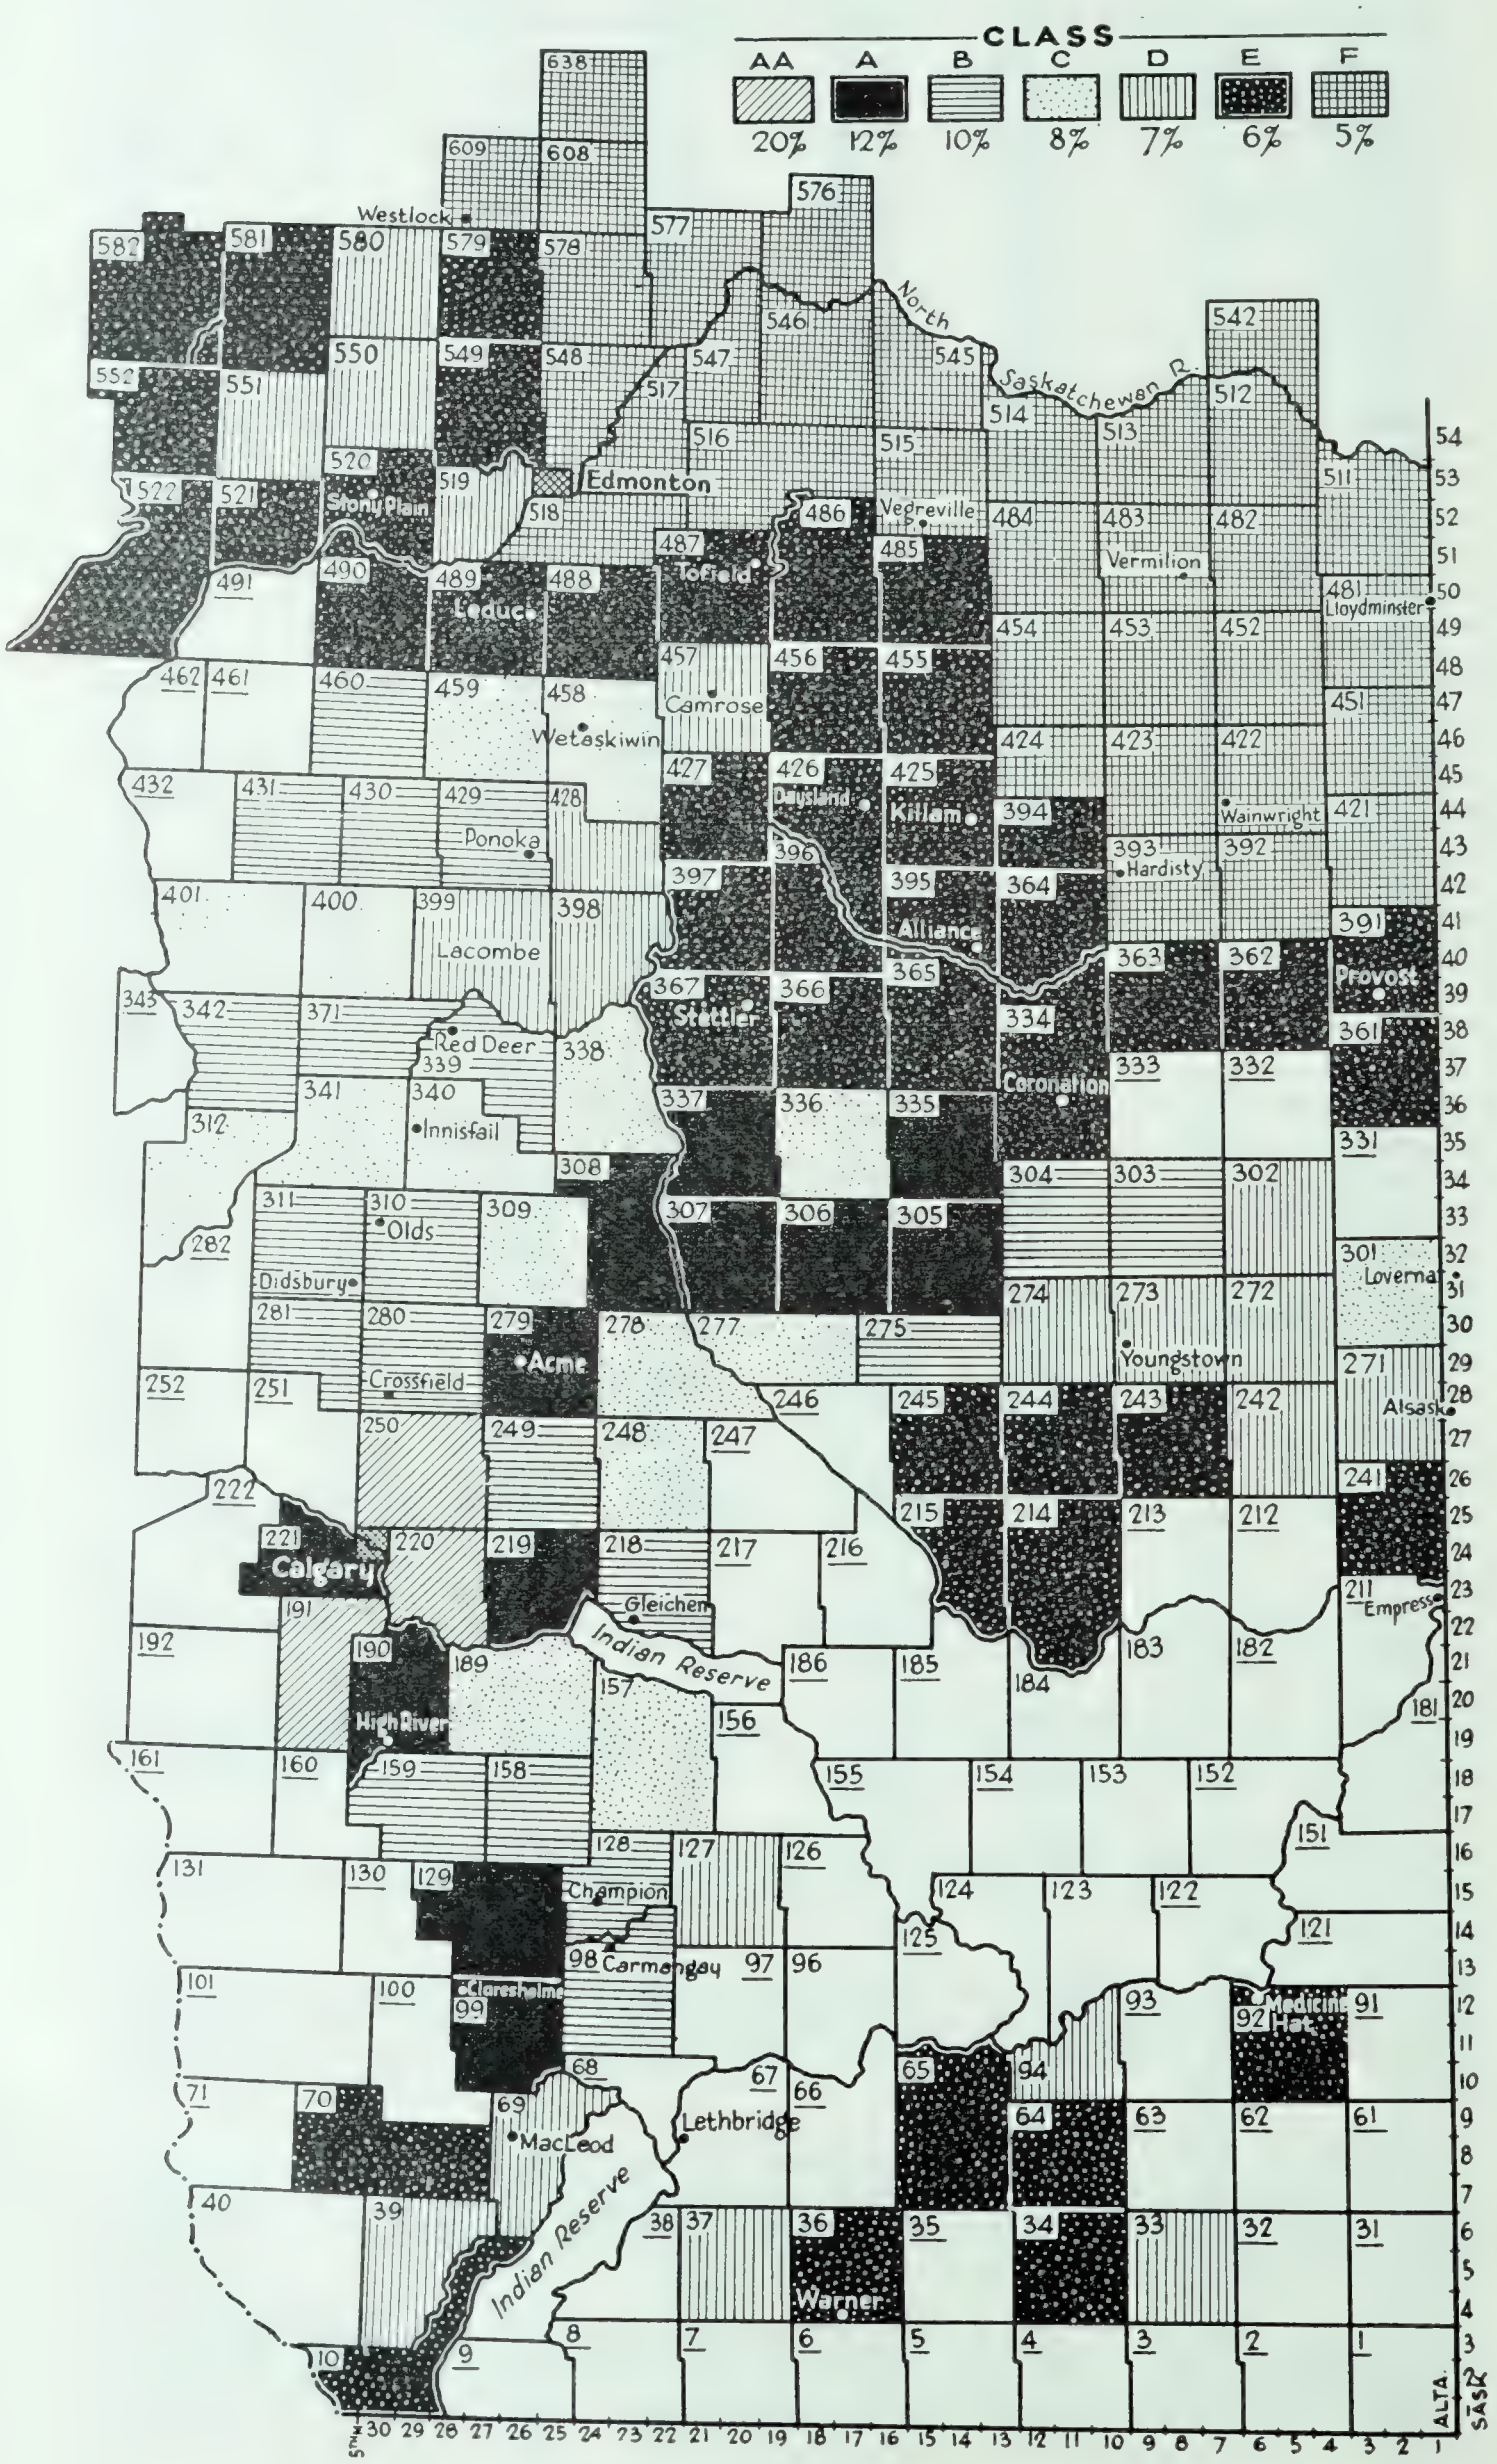
Class C had a rate of 12 per cent, the municipal districts being 157, 158, 249, 301, 303, 304, 309, 312, 336, 338, 339, 340, 342, 400, 458, 459, 460 and 550.

Class D had a rate of 10 per cent composed of municipal districts 10, 33, 34, 36, 37, 39, 69, 70, 127, 189, 248, 271, 272, 273, 274, 277, 278, 341, 362, 363, 398, 399, 401, 428, 457, 519, 549, 551, 552, 579, 580 and 582.

Class E had a rate of 7 per cent and this rate applied to municipal districts 64, 94, 214, 215, 241, 242, 243, 244, 245, 302, 334, 361, 364, 365, 367, 391, 392, 393, 394, 395, 396, 397, 424, 425, 426, 427, 455, 456, 485, 486, 487, 488, 489, 520, 521 and 522.

Class F had a rate of 5 per cent and composed of the following municipal districts 421, 422, 423, 451, 452, 454, 481, 482, 483, 484, 511, 512, 515, 517, 518, 542, 548, 576, 577, 578 and 609.

HAIL PREMIUM RATE FOR 1929 FOR ALBERTA



IMMIGRATION—ALBERTA

Alberta's vast open spaces have a great lure for the immigrant, as the following figures will show:

Fiscal Year—	Number of Immigrants		
	Via Ocean Ports	From the United States	Total
1906	5,671	20,506	26,177
1907	3,474	14,085	17,559
1908	9,405	22,072	31,477
1909	6,100	21,551	27,651
1910	7,946	34,563	42,509
1911	14,923	29,859	44,782
1912	17,386	28,571	45,957
1913	19,513	28,560	48,073
1914	19,730	24,011	43,741
1915	6,506	11,757	18,263
1916	931	6,284	7,215
1917	1,034	11,384	12,418
1918	544	16,277	16,821
1919	1,275	10,365	11,640
1920	6,717	13,283	20,000
1921	7,097	10,684	17,781
1922	5,243	6,582	11,825
1923	4,113	4,685	8,798
1924	6,640	3,790	10,430
1925	7,505	3,447	10,952
1926	8,222	4,318	12,540
1927	11,780	4,587	16,367
1928	10,895	4,578	15,473

BUILDING PERMITS

According to data tabulated by the Dominion Bureau of Statistics, the value of building authorized by 63 cities in Canada during 1928 was considerably greater than in any other year since this record was commenced in 1920, aggregating $219,105,715, compared with $184,613,742 in 1927, $156,386,607 in 1926, and $125,029,367 in 1925. The average index number of wholesale prices of building materials, compiled in the Bureau, stood at 149.3 in 1928, compared with 147.7 in 1927, when prices were lower than in any of the seven preceding years; the index number of wages in the building trades, prepared by the Labour Department, averaged 185.6, compared with 179.3 in 1927. The 1913 figures are the base, equal to 100, upon which both these indexes are computed.

The following are the building permit figures for Alberta:

	Edmonton	Calgary	Medicine Hat	Lethbridge
1910	$ 2,161,256	$ 5,589,594	$	$

NUMBER OF HOTELS IN PRAIRIE PROVINCES, 1927

The following figures are for the spring of 1927. Since that year a record number of new hotels have been erected or are about to be commenced.

	Hotels	Number of Rooms
Manitoba	254	8,212
Saskatchwan	425	13,096
Alberta	441	13,198
Totals	1,120	34,506

METEOROLOGICAL

The general climate of Alberta is clear and bracing. Summers long and warm, with cool nights. Winters cold, but punctuated periodically with spells of very mild weather brought on by the famous chinook winds.

PRINCIPAL CITIES OF ALBERTA

Calgary

Situated on main lines of both transcontinental railways, this city is 840 miles west of Winnipeg. In 1882 Calgary was merely an outpost fort, in 1901 it had 4,300 residents and ranked seventy-third in the list of Canadian cities. Today it has a population approaching 100,000 and is the wholesale centre for an area which had a population, in 1926, of 289,996. Calgary is adjacent to what is rapidly proving to be Canada's greatest oil field.

Calgary City Statistics

Area, acres	26,368
Dwellings, 1927	20,000
Families, 1926	16,150
Scholars, 1927	16,539
Buildings erected 1927	$2,330,131
Buildings erected 1926	$1,999,000
Buildings erected (6 months) 1928	$3,662,047
Voters on List	25,567

Bank Debits, 1926	$717,869,597
Factories	141
Employees	3,613
Pay Roll	$4,897,097
Number of Banks	17

Calgary is one of the most progressive cities in North America. It holds the world's record for number of telephones per 1,000 people. The majority of the homes have both electric light and gas (natural) at cheap rates. Employment has been mounting steadily for several years and is now at new high level. Many new industries have been established during 1927 and 1928. The value of buildings erected in the first six months of 1928 was $3,662,047.

The Calgary Market

Calgary's chief interest to the advertiser lies in its importance as a distributing centre. The Calgary market extends, roughly, 250 miles west of the city, 200 miles east, 100 miles north and embracing southern Alberta almost to the international boundary. This area contains 525 post offices and eight provincial divisions, it has a population of 158,570 rural and 131,426 urban residents, and contains seventy cities, towns and villages. The total number of addresses on the post office list in this area is 42,291.

The city contains 175 wholesale houses and the local Commercial Travellers Association has 1,100 members holding special railroad privileges from this city.

Edmonton

Capital city of Alberta, situated on the North Saskatchewan river, 798 miles west of Winnipeg, 771 miles east of Vancouver and 312 miles north of the international boundary. Thirty-five years ago the present site of Edmonton City held a handful of wooden shacks and some Red River carts. Today Edmonton is a fine city of some 80,000 population and growing at a great rate. It is also the gateway to the famous Peace River District and is said to be the centre of the fastest growing market in Canada. The growth of Edmonton has been phenomenal, in 1901 it ranked seventy-seventh on the list of Canadian cities, now it is ninth. The value of buildings erected during the first six months of 1928 exceeds the average yearly total for six years past. Edmonton City is bounded by the Northern Alberta coal field and has natural gas and oil fields within a few miles of the city limits.

During the past few months many new and important industries have chosen this city as a site for headquarters or branch factories. Existing departmental stores extend regularly each year and new stores have been added.

Three local packing plants handle 200,000 hogs per year, and the city stockyards have a turnover of $7,000,000.

Ranking as the capital city of Alberta, Edmonton contains the Parliament Buildings, University and other provincial offices.

Edmonton City Statistics

Acreage	27,200
Number of Dwellings, 1927	14,013
Number of apartments, 1927	2,519
Number of telephones, 1927	14,998
Water consumers, 1927	15,997
Bank Debits, 1927	$437,356,863
Bank Debits, 1926	$398,020,461
Number of schools, 1927	43
Number of scholars, 1927	16,743
Number of voters, 1927	37,118
Number of factories, 1927	128
Factory pay roll, 1927	$5,082,993

The Edmonton Market

Edmonton is the distributing point for an area of 50,000 square miles reached by main and branch railways radiating from the city and by the rivers and highways. This area contains 740 post offices and has a population of nearly 350,000 people. Agriculture is the chief industry with coal mining second. A total of 134 mines, producing 3,000,000 tons of coal and employing 11,600 mine workers, are within a few hours' ride of the city. Within this market area are 76,428 dwellings and 50,286 farms. Eleven places have a population of 1,000 or more. The whole district is highly prosperous, the famous Peace River district having attracted world-wide attention by its record crops and possibilities. Throughout this market the number of farmers of United States birth exceed the total of British born, and immigration from all parts has set new records in 1928.

Lethbridge

Situated in the centre of southern Alberta, 130 miles south of Calgary and 50 miles north of the international boundary. Headquarters of the Crows' Nest division of the Canadian Pacific Railway. District headquarters for Royal Canadian Mounted Police, Government Telephone System, Judicial System, Irrigation System and School Control Board. Distributing point for south Alberta and the Crows' Nest Pass coal fields and for extensive mixed and wheat farming area.

Lethbridge Statistics

Population, 1927	12,000
Dwellings, 1926	2,438
Total Assessment payers	8,427
Population increase in 10 years (percentage)	95
Churches	12
Parks	3
Public Schools	8
Scholars	3,043
English reading (percentage)	98
Per capita Building Permits, 1927	$36.50
Per capita Building Permits, 1926	$19.66
Bank Debits, 1926	$67,394,727
Bank Debits, 1927	$64,105,290

Rapid progress was reported by this city during 1927. A new hotel was erected at a cost of $250,000, a new Y.M.C.A. costing $75,000. The leading departmental store opened a large extension. Growth was manifested in practically all directions.

The Lethbridge Market

The Lethbridge market is a well defined area embracing the Lethbridge division of the Canadian Pacific Railway, the Lethbridge crop district, the Lethbridge and Crows' Nest coal area and the Southern Alberta Irrigation system.

Government statistics put the wealth of Southern Alberta in 1927 at eighty million dollars. The Lethbridge Crop District harvested 40,000,000 bushels of wheat in 1927 and 1928 will probably exceed that total.

A wide diversity of industries, including farming, mining, dairying, sugar making, wool growing and sheep farming, make this area a staple year-round market and the past few years have shown very substantial growth.

Character of Industries

(Estimated wealth)

Agriculture	$67,000,000
Coal	10,000,000
Sugar	600,000
Manufacturing	1,500,000

Lethbridge is the distributing centre for an area containing 85 towns, 22 of which have a combined population of 22,000 with 4,984 homes. The city contains 89 manufacturing, wholesale and distributing firms. Employment throughout the area stands at a new high level.

Medicine Hat

Situated on South Saskatchewan river, 165 miles south-east of Calgary, on the Canadian Pacific Railway. Area 11,000 acres, population, 1927, 9,520. The city owns electric light, power, water and natural gas.

Within the A. B. C. trading area of 35 miles are 40,000 people on railway lines and roads connecting with this city.

Medicine Hat acts as a distributing centre for this area, the city has ten wholesale houses and is also the headquarters of a small chain of grocery stores operating in the district. It is also the centre of important manufacturing industries.

THE PROVINCE OF ALBERTA HAS:

1. An area of 255,285 square miles.
2. Over 60,000,000 acres of land capable of agricultural development.
3. 15,000,000 acres of land still open for homesteads or lease.
4. 63 per cent of natural gas production in Canada.
5. 77.4 per cent of petroleum production in Canada.
6. 14 per cent of the world's coal reserves, and 87 per cent of the coal in Canada.
7. 60,000 square miles of merchantable timber.
8. 15,000 square miles of tar sand deposits.
9. 1,500,000 horse power available water power.
10. 4,500,000 acres in National Parks.
11. 15,000,000 acres under cultivation.
12. A population of 646,000.
13. 5,300 miles of railroads.
14. 1,000 grain elevators, capacity 40,000,000 bushels.
15. 60,000 miles of highways.
16. An automobile registration of over 90,000.
17. A government-owned and government-operated telephone system.
18. Over 21,000 rural telephone subscribers.
19. 3,200 schools in operation.
20. 160,000 students attending educational institutions.
21. 115 school fairs.
22. 40,000 boys and girls engaged in school fair work.
23. Four agricultural schools, teaching agriculture and home economics. Over 500 students attend each term.

24. University of Alberta with an enrolment of over 1,500 students.
25. A system of co-operative marketing including:
    - A wheat pool;
    - A poultry and egg pool;
    - A livestock pool;
    - A dairy pool;
    - A wool growers' pool.

25*a*. A Provincial Farm Loans Board.
26. 4 Provincial Demonstration farms.
27. 3 Dominion Experimental farms.
28. 100 creameries and 9 cheese factories.
29. Some of the largest flour mills in Canada.
30. 2 public stock yards.
31. 6 packing plants.
32. A large producing oil area with 4 refineries in operation.
33. 75 agricultural society fairs.
34. 15 seed fairs.
35. A system of rural municipal hospitals.
36. Travelling nurses in rural districts.
37. Rural mail delivery.
38. World's champion growers of wheat and oats.

DESCRIPTION OF CENSUS DIVISIONS, PROVINCE OF ALBERTA

DIVISION No. 1 comprises the municipalities of Flowery Plain (33), Burlington (34), Warner (36), Forty Mile (64), Eureka (65), Excelsior (92), Bow Island (94); Local Improvement Districts 1, 2, 3, 4, 5, 6, 31, 32, 35, 61, 62, 63, 66, 91, 93; Cities—Medicine Hat; Towns—Bow Island, Irvine, Taber; Villages—Burdett, Grassy Lake, Milk River, Walsh, Warner.

DIVISION No. 2 comprises the municipalities of Cochrane (10), Kerr (39), Castle River (40), Bright (69), Livingstone (70), Argyle (99); Local Improvement Districts—7, 8, 9, 37, 38, 67, 68, 71, 100, 101; Indian Reserves —Peigan Reserve, Blood Agency; Cities—Lethbridge; Towns—Blairmore, Cardston, Claresholm, Coleman, Diamond City, Granum, Macleod, Magrath, Pincher Creek, Raymond; Villages—Coaldale, Coalhurst, Commerce, Cowley, Frank, Monarch, Pincher City, Stirling.

DIVISION No. 3 comprises the municipalities of McLean (96), Sunny South (123), King (153), Britannia (183); Local Improvement Districts— 121, 122, 124, 125, 126, 151, 152, 154, 155, 156, 181, 182, 184, 185, 186, 211; Towns—Bassano, Brooks, Redcliffe; Villages—Alderson, Duchess, Empress, Enchant, Jenner, Retlaw, Suffield.

DIVISION No. 4 comprises the municipalities of Little Bow (98), Clifton (127), Harmony (128), Clear Lake (129), Marquis (157), Royal (158), Riley (159), Dinton (189), Sheep Creek (190), Stockland (191); Local Improvement Districts—97, 130, 131, 160, 161, 192; Unorganized parts between townships 17 and 22 west to the provincial boundary; Towns— Carmangay, High River, Nanton, Okotoks, Stavely, Vulcan; Villages— Barons, Blackie, Cayley, Champion, Lomond, Nobleford.

DIVISION No. 5 comprises the municipalities of Berry Creek (214), Bulyea (215), Acadia (241), Cereal (242), Collholme (243), Flowerdale (244), Lonebutte (245), Bertawan (271), Golden Centre (272), Sounding Creek (273), Richdale (274), Hand Hills (275), Michichi (277), Canmer (301), Stewart (302), Wiste (303), Hiram (304), Dowling Lake (305), Lambton (306), Starland (307); Local Improvement Districts—212, 213, 246; Towns—Drumheller, Hanna, Youngstown; Villages—Cereal, Chinook, Craigmyle, Delia, Morrin, Munson, Oyen, Richdale, Rumsey.

DIVISION No. 6 comprises the municipalities of Blackfoot (218), Bow Valley (219), Shepard (220), Springbank (221), Grasswold (248), Keoma (249), Beddington (250), Carbon (278), Norquay (279), Rosebud (280), Beaver Dam (281), Ghost Pine (308), Stauffer (309), Mountain View (310), Westerdale (311); Local Improvement Districts—216, 217, 222, 247, 251, 252, 282; Unorganized parts between townships 21 and 31 west to the provincial boundary; Indian Reserves—Stony Reserve, Sarcee Reserve, Blackfoot Agency; Cities—Calgary, Banff (not incorporated); Towns—Didsbury, Gleichen, Olds, Strathmore; Villages—Acme, Airdrie, Beiseker, Carbon, Carstairs, Cochrane, Crossfield, Irricana, Langdon, Rockyford, Rosebud, Three Hills, Trochu.

DIVISION No. 7 comprises the municipalities of Coronation (334), Sullivan Lake (335), Rosenheim (361), Hillcrest (362), Stocks (363), Flagstaff (364), Progress (365), Sifton (391), Vale (392), Huamha (393), Asquith (394), Wheatland (395), Ribstone (421), Gilt Edge (422), Battle River (423), Kinsella (424), Stirling (425), Iron Creek (455); Local Improvement Districts—331, 332, 333; Towns—Castor, Coronation, Hardisty, Wainwright; Villages—Alliance, Cadogan, Chauvin, Consort, Czar, Edgerton, Forestburg, Galahad, Hughenden, Irma, Killam, Lougheed, Monitor, Provost, Sedgewick, Strome, Veteran, Viking.

DIVISION No. 8 comprises the municipalities of Success (336), Vimy (337), Hayes (338), Pine Lake (339), Arthur (340), Dublin (366), Waverley (367), Haig (396), Lakeside (397), Lamerton (398), Crown (399), Melrose (426), Evergreen (427), Waterglen (428), Fertile Valley (429), Parkland (456), Lloyd George (457), Montgomery (458), Bigstone (459); Indian Reserves—Hobbema Agency; Cities—Red Deer, Wetaskiwin; Towns —Big Valley, Camrose, Daysland, Innisfail, Lacombe, Ponoka, Stettler; Villages—Alix, Bashaw, Bawlf, Bittern Lake, Blackfalds, Botha, Clive, Delburne, Donalda, Erskine, Ferintosh, Gadsby, Halkirk, Heisler, Millet, Mirror, New Norway, Ohaton, Penhold.

DIVISION No. 9 comprises the municipalities of Waterloo (312), Poplar Grove (341), Raven (342), Prairie Creek (343), Golden West (371), Lorne

(400), Lochearn (401), Blindman (430), Last West (431), Columbia (460); Local Improvement Districts—344, 374, 403, 432, 434, 461, 462; Unorganized Territorial Units 433, 463, 464; Unorganized parts between townships 30 and 47 west to the provincial boundary; Villages—Bentley, Bowden, North Red Deer, Rimbey, Rocky Mountain House, Sylvan Lake.

DIVISION No. 10 comprises the municipalities of Merton (451), Grizzly Bear (452), Buffalo Coulee (453), Lakeview (454), Wellington (481), Vermilion Valley (482), Melberta (483), Birch Lake (484), Patricia (485), Beaver Lake (486), Streamstown (511), Ethelwyn (512), Ukrainia (513), Sobor (514), Norma (515), The Pines (516), Eagle (545), Wostok (546), Leslie (547); Towns—Lloydminster (part), Vegreville, Vermilion; Villages—Bruderheim, Chipman, Holden, Innisfree, Islay, Kitscoty, Lamont, Lavoy, Mannville, Minburn, Mundare, Ryley.

DIVISION No. 11 comprises the municipalities of Cornhill (487), Black Mud (488), Liberty (489), Pioneer (490), Clover Bar (517), Strathcona (518), Spruce Grove (519), Inga (520), Tomahawk (521), Sturgeon (548), Ray (549), Woodford (550), Morthen (551); Local Improvement District 491; Indian Reserves—Edmonton Agency; Cities—Edmonton; Towns—Beverly, Fort Saskatchewan, Leduc, Morinville, St. Albert, Stony Plain, Tofield; Villages—Alberta Beach, Seba Beach, Wabamun.

DIVISION No. 12 comprises the municipalities of Rocky Rapids (522), Pembina (552), Kitchener (582); Local Improvement Districts—496, 523, 525, 526, 527, 553, 554, 555, 556, 557, 558, 583, 584, 585, 588, 612, 615, 616; Unorganized Territorial Units—493, 494, 495, 524, 586, 587; Unorganized parts between townships 46 and 57 west to the provincial boundary; Towns—Edson; Villages—Entwistle.

DIVISION No. 13 comprises the municipalities of Lincoln (542), Laurier (543), Champlain (544), Boucher (572), St. Vincent (573), St. Lina (574), Wasel (575), Ashmont (605); Local Improvement Districts—541, 571, 601, 602, 603, 604, 631, 632, 633, 634, 635, 661, 663, 664, 666, 695; Unorganized Territorial Unit 662; Indian Reserves—Saddle Lake Agency, Frog Lake Reserve, White Fish Lake; Villages—St. Paul de Metis.

DIVISION No. 14 comprises the municipalities of Smoky Lake (576), Unity (577), Opal (578), Hazelwood (579), Lockerbie (580), Pershing (581), Tawatinaw (608), Pibroch (609), Cartier (637), Nelson (638), Grosmont (668); Local Improvement Districts—606, 607, 610, 611, 636, 639, 640, 665, 667, 669, 696, 697, 698, 699, 726, 727, 729; Unorganized Territorial Unit 728; Towns—Athabasca; Villages—Clyde, Lac La Biche, Legal, Westlock.

DIVISION No. 15 comprises Local Improvement Districts—613, 614, 641, 642, 643, 647, 670, 702, 705, 706, 707, 708, 709, 730, 731, 732, 733, 734, 735, 736, 737, 738, 764, 765, 766, 767, 794, 795, 796, 825, 826, 854, 855; Unorganized Territorial Units—617, 618, 619, 620, 621, 622, 644, 645, 646, 648, 671, 672, 673, 674, 675, 676, 677, 678, 679, 700, 701, 703, 704, 710, 824; Unorganized parts between townships 56 and 69 west to the provincial boundary and the part of T. 69, R. 10 and 11, W. 5th Meridian, south of the Wapiti River; Indian Reserves—Grouard, Sturgeon Lake, Sawridge, Swan River, Drift Pile, Sucker Creek; Towns—Grouard, Peace River.

DIVISION No. 16 comprises the municipalities of Grande Prairie (739), Bear Lake (740), Spirit River (829), Peace (857), Fairview (858); Local Improvement Districts—741, 742, 769, 770, 771, 772, 797, 800, 801, 827, 828, 830, 831, 859, 860, 861, 886, 887, 888, 889, 916, 917; Unorganized Territorial Units—890, 891, 918, 919; Unorganized parts between townships 86 and 90 and between U.T.U. 919 and the western provincial boundary; Indian Reserves—Saskatoon Lake, Moberly Lake, Hudson Hope, St. John, Dunvegan, Peace River; Towns—Grande Prairie; Villages—Clairmont, Spirit River.

DIVISION No. 17 comprises the remainder of the province consisting of northern parts; Indian Reserves—Long Lake, Chipewyan, Little Red River, Boyer River, Upper Hay River, Wabaska, Fort Vermilion.
